"We can't solve problems by using the same kind of thinking we used when we created them."

- Albert Einstein

The Fort Drum Business Transformation Team, is tasked with supporting the workforce and command in finding more efficient ways to use our time and money in support of the many missions and customers we serve.

This is accomplished by providing programs which encourage involvement by the workforce who make great things happen each day; by generating improvement ideas, reviewing processes to ensure they deliver all they can, and use opportunities identified by the workforce to fix challenges.

Check out our program links to the left or contact us for more information.
